Department of Applied Economics
University of Minnesota
1994 Buford Ave
337K Ruttan Hall
Saint Paul, MN, USA 55108 – 6040

Research Interests

Primary Fields	Environmental and Resource Economics | Development Economics
Secondary Fields	Industrial Organization

Current Appointments

Ph.D. Student in Applied Economics	University of Minnesota
Principal Investigator	J-PAL MEL
Research Associate	American University of Cairo
Visiting Instructor	Hamline University
Research Fellow	Institute for Replication

Education

Ph.D. in Applied Economics – University of Minnesota	Present
M.S. in Applied Economics – University of Minnesota	2026
M.S. in International and Development Economics – University of San Francisco	2020
B.S. in Economics – Saint Louis University	2018
B.S. in International Business – Saint Louis University	2018
Visiting Student	
Saint Louis University – Madrid	2017 – 2018
Bond University	2016
Spring Hill College – Bologna	2016

Job Market Paper (JMP)

Regenerative Agriculture and Farmer Profitability: Modeling Adoption for Scalable Climate Mitigation Paper Link

Abstract: Agriculture is a major source of greenhouse gas emissions, but large-scale climate mitigation in this sector depends on whether conservation practices are privately profitable for farmers. This paper studies two core regenerative practices in U.S. row-crop systems — cover cropping and no till — and asks whether adoption improves farm profitability while building soil carbon. Empirically, I combine a panel of corn, soybean, and wheat farmers in the Midwest from 2010 - 2025 with a machine-learned county-year soil panel trained on ground-truth soil tests to examine farmer decisions and outcomes to changes in the soil. I estimate reduced-form using a staggered difference-in-difference design to address endogenous adoption. I then map the estimated relationships into a structural model of farmer decision-making to evaluate adoption incentives under heterogeneous farm conditions. I find that long-run improvements in soil organic carbon (SOC) drive long-run production gains, but profitability is muted by switching costs of adoption. This suggests that large-scale climate mitigation in row crop production is limited not by agronomic potential, but by private adoption costs, which can be addressed through appropriately designed policy interventions.

Scaling Education Reform: Evidence from Morocco's Pioneer School Program Paper Link

Abstract: Can governments sustain large learning gains when evidence-based interventions move from pilot implementation to national scale? We study this question using Morocco's Pioneer School Program (PSP), a nationwide reform that combines two Global Education Evidence Advisory Panel "great buy" approaches: structured pedagogy and targeted remediation by learning level. The reform was rolled out in phases, expanding from 626 schools in 2023-24 to 4,626 schools in 2025-26, which allows us to compare effects across exposure duration and rollout cohorts. We estimate intent-to-treat effects using a matched-pair difference-in-differences design built from rich administrative records on all public primary schools and original student assessment data in Arabic, French, and mathematics. Student achievement is measured using psychometrically linked test scales (IRT), and identification is strengthened with post-double-selection LASSO controls and pre-trend evidence from seven years of historical data.

Three findings emerge. First, PSP generates large gains in foundational learning relative to comparison schools. Second, treatment effects vary across cohorts and years of exposure, consistent with changes in implementation conditions during rapid scale-up. Third, estimated impacts remain large in global comparative perspective, placing Morocco's reform among the higher-effect government-led interventions in recent evidence syntheses. Motivated by these patterns, we use the voltage-effect framework (List, 2026) to interpret how implementation quality, sample composition, and effective dosage can mediate the pilot-to-scale transition. The results contribute to the economics of education reform by showing both the promise of system-level scaling and the constraints that determine whether early gains persist as reforms expand through public delivery systems.

Pre-Doctoral Research Experience

J-PAL — Aug. 2025 – Aug. 2027
Research Associate | *American University of Cairo* — *Remote*
- Supervised by Dr. Paul Glewwe — Development Economics

University of Minnesota — Aug. 2026 – Dec. 2026
Research Assistant | *Regional Sustainable Development Partnerships* — *St. Paul, MN*
- Supervised by Crystal Rayamajhi — Environmental Economics

J-PAL — Dec. 2024 – Dec. 2026
Principal Investigator | *Morocco Innovation and Evaluation Lab* — *Remote*
- Supervised by Dr. Paul Glewwe — Development Economics

University of Minnesota — Jan. 2026 – May 2026
Research Assistant | *Department of Applied Economics* — *Saint Paul, MN*
- Supervised by Dr. Justin Johnson — Environmental Economics

University of Michigan — Mar. 2025 – Dec. 2025
Research Associate | *Ross School of Business* — *Remote*
- Supervised by Dr. Sarah Miller and Dr. Andrew Goodman-Bacon — Labor Economics

University of Ottawa Feb. 2024 – June 2025
Replication Fellow | Institute for Replication *Remote*
- Supervised by Dr. Abel Brodeur — Replication

Minnesota Pollution Control Agency Jan. 2025 – May 2025
Research Assistant *Saint Paul, MN*
- Supervised by David Bael and Dr. Justin Johnson — Climate Economics

University of Minnesota Aug. 2023 – Dec. 2023
Research Assistant | Department of Applied Economics *Saint Paul, MN*
- Supervised by Dr. Chengyan Yue — Neuroeconomics

University of Michigan Jun. 2020 – Aug. 2022
Research Area Specialist Associate | Population Studies Center *Ann Arbor, MI*
- Supervised by Dr. Dean Yang and Dr. Tanya Rosenblat — Development & Behavior Economics

University of San Francisco Feb. 2019 – Aug. 2020
Research Assistant | Economics Department *San Francisco, CA*
- Supervised by Dr. Jesse Anttila-Hughes — Environmental Economics

BRAC Uganda May 2019 – Aug. 2019
Research Intern | Independent Evaluation and Research Center *Kampala, Uganda*
- Supervised by Dr. Munshi Sulaiman and Dr. Danish Us Salam — Developement Economics

University of San Francisco Jul. 2018 – Jan. 2019
Business Intelligence Analyst Intern | Office of Research and Analytics *San Francisco, CA*
- Supervised by Calypso Fugit — Demography

Saint Louis University – Madrid Jan. 2018 – May 2018
Research Assistant | Business and Economics Department *Madrid, Spain*
- Supervised by Dr. Paolo Saono and Dr. Laura Muro — Business & Gender Economics

Saint Louis University Jan. 2017 – May 2017
Research Assistant | Economics Department *Saint Louis, MO*
- Supervised by Dr. Hailong Qian — Urban Economics
